SCORES POOR-QUALITY PRODUCTS OF FURNITURE FACTORIES

The "23 December Factory supplies commercial organizations with comparatively well-made furniture. The "Rodopi" Factory makes solid, well-designed and very satisfactory desks, as well as good carved work. However, there are furniture enterprises whose production does not meet with the approval of the customers.

- - A larger number of furniture enterprises make their furniture of green and low-grade lumber and, as a result, the doors of wardrobes warp. Certain enterprises refrain from manufacturing smaller pieces of furniture, such as basins, bookcases, small home-library shelves, childrens beds, childrens chairs, etc., which are very such in demand.

The "Narmag" (People's Store) Enterprise has refused to buy a large part of the manufactured furniture pieces because of their various defects. For irstance, the manufactured furniture pieces because of their various defects. For iratance 500 warped beds and 800 wardrobes with warped doors, manufactured by the "V. Rashev" State Industrial Enterprise have been rejected. The "23 December" State Industrial Enterprise received rejections for 60 wardrobes; the "Mebel" (Furniture) Enterprise, for 50 wardrobes; and of the 80 sideboards manufactured by the "M. Zekhtinkov" Enterprise only four were accepted on 27 July of this year. The "Strastin" Enterprise received rejections for 100 warped by the best tables. "Strastin" Enterprise received rejections for 100 warped kitchen tables. In spite of numerous warnings, the "Strastin" Enterprise continues to produce Viennese chairs with wicker seats made of green material which sags very quickly and causes the chairs to lose their good outward appearance.

The "Moskva" State Industrial Enterprise manufactures low-grade extension tables, with cracked veneer surfaces and misshapen and warped leaves. The chairs manufactured by the same enterprise are too uniform, and have large empty spaces between the wooden frame and the upholstery. The "Republika" State Industrial Enterprise produces unpolished and marred bookcases, defective davenports, and misshapen dining room sideboards and tables.

The lowest-grade production is turned out by the "Gorska Industriya" (Forest Industry) State Enterprise. Its branches turn out in mass production different kinds of furniture, according to their own plans. The yellow chairs manufactured here are not glued with carpenter's glue and, after drying, the different parts separate; the legs are crooked and poorly shaped, and frequently parts of the bark still remain on them. For the most part, the wardrobes are made of defective veneer and plywood, and have very rough surfaces and many other defects.

Because it discovered a large number of defects, the "Stroymatmetiz" Enterprise has refused to accept 1,500 yellow chairs from the "Tumrukchal" Factory; the "9 September" Enterprise at Provadiya has had 30 desks rejected; the enterprise at Shipkovo, 750 chairs; the enterprise at Oreshak, Troyan Okoliya, 500 ordinary chairs; the "V. Rashev" State Industrial Enterprise, 190 double beds; the workshop at the central prison, kitchen tables, beds, etc.; the "Stratsin" Factory, 500 kitchen tables; the "Kalyashki" State Industrial Enterprise at Kyustendil, yellow chairs; the "Oborishte" State Industrial Enterprise at Simitli, threewing wardrobes and desks; and the "G. Dimitrov" State Industrial Enterprise at Botevgrad, wardrobes, and kitchen sideboards.
